

Hello my fellow Wildfeather neighbors!

My name is Howard Yu and I have been a resident of Wildfeather since 2015. I am finishing my first term as board member serving both as Vice-President and ARC chairperson and am hoping to re-earn your vote to remain on the board.

My background as a Senior Project Manager in construction coupled with my Master's degree in Architecture has brought invaluable insights to our board and our leadership. In my current role, I specialize in contract reviews, contract negotiations, budgeting, and simultaneously managing a team of junior project managers and several multi-million-dollar projects – skills which I have used in the past two years to serve our community.

During my short tenure on the board, I've worked with the board and our residents to start 'trimming the fat' on some of our by-laws, most notably working with the board to revise tree trimming requirements. This has helped tremendously in our community both by allowing our residents to use common sense to maintain our beautiful community and increase safety by reducing the need for residents to wait to trim their trees during the approval process, especially for tree limbs at risk to fall.

In my free time, I enjoy boating, fishing, camping, and spending time with my family – especially my two boys, Connor (10) and Cayden (7), my wife, Sharon, and generally enjoying our community and all the wonderful people who are a part of it.

As our neighborhood continually grows and develops, I believe the board should grow and develop with the neighborhood. I want to continue to be a part of this growth and development utilizing my skills and knowledge to maintain and innovate contemporary views for planning for our future as a community.

My goal is to continue to work hand in hand with the board and our community to review outdated regulations, revise, and set realistic and reasonable expectations and goals rooted in common sense for everyone (new or otherwise) involved to make our community a place of which we can all be proud.
